Introducing the New BDC Dust Collector from United Air Specialists, Inc.

The new BDC dust collector is a compact, maintenance friendly and cost-effective dust collector from United Air Specialists, Inc. (UAS). Keeping in line with Smog-Hog and the other dust collection systems, UAS continues to introduce new and innovative products to help you solve your air quality issues.

The advanced BDC collector features flexibility by offering the largest selection of high filtration media filters for applications including woodworking, grinding & polishing, metalworking, food processing (available in SS construction) and more. The BDC system has been designed so that it can be easily configured to meet your specific needs utilizing four basic filter options listed below:

- 10" diameter cartridges
- 6" diameter pleated bags
- 6" diameter felted bags
- 2" diameter felted bags

Unlike other collectors that require the worker to crawl into the collector (a practice that is slow, dirty & dangerous), the filters in the BDC can be removed quickly by unlocking the cam bar and simply sliding the filter trays out. Since the system operates automatically & with continuous-duty, the BDC requires little maintenance.

This versatile collector can easily be converted for use on other applications by simply replacing the removable tube sheet to accommodate the filters that meet your new requirements.

For information or a quote on this system, visit our website @ www.dynacomonline.com or call us at 800-229-7664.

Keep a look out for more new products by UAS and Dynacom, Inc. in our next issue of "NO EXCUSES".

United Air Specialists, Inc. also introduced the VSD downdraft tables (pictured above) at the Bulk Powders Show in Chicago. The tables are available with or without cartridge pulse cleaning and have optional casters for those applications which require mobility. Call if you would like additional information.

DID YOU KNOW...

Dynacom, Inc. does ceiling tile cleaning. As an authorized Ceiling Pro service center, we can give your offices a makeover.

Quit replacing or painting over old ceiling tiles and start saving \$\$\$ by cleaning them.

Used But Not Abused!

"Used Equipment"

Qty.	Equipment	Rating
3	SMOG-HOG SH10PE (1000 cfm never used)	10
1	Smog-Hog SG4SHM (6000 cfm tandem pass)	9
2	Smokeeter LS (concealed) tobacco smoke units	7
1	Porta-Hog portable cartridge collector (1000 cfm)	8

Rating: New = 10

Sports Trivia

The best Olympian ever?

How many gold medals did Mark Spitz win in the 1968 Olympics?

See www.dynacomonline.com for the answer!

To Do List:

- Take a risk!
- Try something new!
- Lose fear of failure!

As Malcom Forbes said, "Failure is success...if we learn from it."

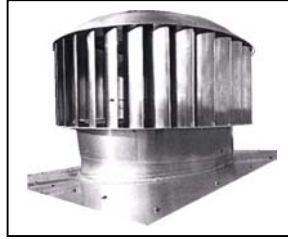

PRODUCT / INNOVATIONS

Industrial Wind Driven Turbine Ventilators

The rise of hot air or convection creates a positive pressure in the upper levels of your plant leading to the "stack effect." As the heat leaves the building at the roof, the air at the floor is displaced by cooler air.

A properly designed gravity opening will provide ventilation due to stack effect. With the Hurricane wind driven turbine ventilator, the wind strikes the vertical vanes causing the head to rotate. By harnessing the wind, ventilation can be improved by 600% or more. Benefits to the Hurricane include:

- No Electrical Operating Costs
- No Wiring Costs
- No Starter Costs
- No Maint. Costs
- Light Weight
- Quiet Operation
- 5 Year Warranty

Dynacom, Inc. can help you with all of your ventilation and make-up air requirements. Call for a free catalog on disk.

APPLICATIONS

Cartridge Cleaning Saves Customers Big Bucks

Dynacom, Inc. has over 25 years of experience is applying air filtration & dust collection systems. This knowledge helps us in the process of selecting the filter to maximize performance (life & efficiency) for your application. Our after market filters and cartridges are quality and cost competitive. We also offer cleaning of cartridges and other filter elements. Several of our customers recoup valuable materials

such as powder paint and tungsten powders from our cleaning process. Please call if you would like to invite one of our sales engineers into your plant to review your current filter requirements. Call today @ 1-800-229-7664!

HOT?

WE HAVE FANS IN STOCK

Dynacom, Inc. maintains a stock of pedestal and wall fans for quick delivery in the hot summer months. Call for pricing and a list of fans in stock.
